in the formula, M represents an alkali metal selected from sodium, potassium and lithium and n is 1,000 to 3,000. The formula above is commercially available product

(col. 3 lines 27-col. 4 line 11) wherein the polymer is present in the amount of 0.05 to 2 percent by weight. The reference fails to teach the specific binder set forth in claim 1 by Applicant. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to substitute the claimed commercially available water-soluble polymer Kelcorete 200 (page 6 line 7 of Applicant specification) for that disclosed by Tsujio motivated by the fact that such polymer (saccharide) materials are known for use in composition such as that disclosed by Toshimitsu JP 04-214782.

Response to Arguments

Applicant's arguments filed 12-19-07 have been fully considered but they are not persuasive.

Applicant argues that saccharides are produced from various plants, sea-weeds, fungi, etc. and the claimed ink composition can provide unexpected results. However, it is the position of the Examiner that examples set forth in the specification is not convincing, because it does not use the saccharide as taught by Tsujio which is very similar in structure, to that claimed by Applicant, one of ordinary skill in the art would expected the structure taught by Tsujio to have similar properties of the structure claimed by Applicant absence tangible evidence to the contrary.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
